Kick'88:

The West end Boys going to kick some members out there group. I wonder who!

Party!?:

The BB, GP and TNT planed a Party in Regensburg, but there ain't going to be a Party. Cause the Genesis kicked macho man out there group, now macho man can't pay the rent for the hall. So guys no party.

Without?:

I am sure you have heard about the copy-party on the 17th december from Radwar. But without any Computer. Hmm that's strange. So that ain't a Copy-Party. There isn't any Software swapping going on just some experience swapping.

Join a new group:

Comtec of WOT thought about joining MCG, but at last the didn't.

Cheap!:

TBP bought a original from xades s. TBP did not send the 2ODM. Xades meant if the ain't paying than iam going to call the cops.

That's nice:

Injun of Agile joined 2000 A.D. I think that's the right place fro him.

INTERVIEW: Manfred Trenz !

At the Rainbow Arts partie I met Manfred Trenz, the programmer of the game: KATAKIS. I interviewed him fast and that's the result :

Gunnar/SMASHER: First of all we want to know how old are you ?

Manfred Trenz: Guess, guy !

G: Hm, yes , let me think ! I would say you're 80 years old (Uahaha !)

M: Almost right ! I'm 23 !

G: OK. How did you get your machine ?

M: Well, someone get thiz machine and I thought I need one too. First I started (as everybody) with playing games

G: And how did you join Rainbow Arts ?

M: Not I joined Rainbow Arts ... they got me !

Well as I hadn't got anymore fun of playing shitty games I drew sum pictures and sent them to a compet. There I get on the third place with it and Rainbow Arts asked me if I would work at them as a painter.

G: When did you make your first game ?

M: Well, I programmed sumthing 4 my own a little bit at home... then on a Rainbow meeting I programmed a bit at then the chef asked me: "What are you doing there ?". And I replied: "I program a game , as you can see !". So then I work for Rainbow as a programmer.

G: Which games did you program up to now ?

M: I programmed Katakis and I was forced to program R-Typ

G: Which targets do you have in the future ?

M: I want to make a game with shooting and butchery.

I also want to compile a little bit of fantasy... she said: action pure !!

G: What are you doing in your spare time ?

M: I don't have any, but if I have sum free minutes I enjoy hearing cool zaks !

G: What zaks ??

M: Original synthesizer (J. Michel Jarre), rock and when I program: heavy !

- read on next side , please ! -

INTERVIEW (II. PART)

:Wot is your favourite zak on C64 ?
:I would say: Cybernoid from M. of Noise !
:Wot is your favourite film ?
:My favourite film is ALIEN II (not to be mixed up with the game !).
:Ah, ya ! Can you tell us which game do you mostly prefer ?
:I havn't one on the C64, but on Amiga it's Virus ! And 4 insider in the Game-Hell (???) there're many cool action games like: Galaxy Force II, R-Type, Darius, Twin Cobra etc.
:Last question: can you think of another job than working as a programmer ?
:Of course : Not ! I like my job and I think other jobs are lame !

COP-TIME !

Everybody knows the problem with the software police one more one less. In fact, I know it very well, I hope I can give you some cool tips. If you should meet the cops one day - don't panic! You will be brought to the headquarter to write down your declaration. The first question will be whether and since when you own copies etc. You are in a better position, because normally the cops have no idea of these things. In no case you are allowed to mention any names, any adresses or any telephonenumber, because that will bring the others and espacially you in many trouble. If you are sure that they can proof something, tell that you wrote some demos and swapped these and a few times some games. Don't say that you programmed an intro, because the cops become crazy through the word 'intro'. Give a little number of your contacts and sendings. They normally know your PLK number. Shut your PLK immedeatly. If the cops ask you after that you can say that you do not own one. Of course you should not have copies at home!! Bring them to a friend who has no computer. And care of the envelopes!! Put them in the dustbin (but in the neighbour's one). Formate all your discs without any name, don't write your name on the covers. Besides, you should make a demo collection. If the cops don't belive your declaration, insist on it! They have to proof the oppesite. Most they have no proofs only your adress is found somewhere else. Say that you have answered an announce. Never write an adresslist, make a coded program with the adresses. Don't give the cops a chance to destroy the scene.

See ya again,
Harry / 711

NEXT ISSUE WE'LL HAVE 4 SIDES GAME OVER !!

Here is an article from GP about some wrong infos and news in the last SMASHER:

Gosh ! I can't stand it ! Somedays ago I've been reading a new magazine called SMASHER . I really liked it ! Lot's of news, cool graphics (my own), etc...etc...really cool! But then after reading the second page I couldn't trust my eyes. There was some chatting called 'NEWS from Frontline'. There were really a lot of shit and rumours (also from the NEWS of Dave E.) without any sence, about many groups. Even about us. So let me tell something about those news:

1) Federation against GP, especially against Time Lord, Snacky and Macho Man.

Wahhahahahaha! Listen... Maybe there really is a Federation against Gp, but that Federation must be really lame, 'cause I've never heart of it before! So, I called the guys at SMASHER and guess what... they apologised and said it wasn't their fault... but the gigs who told them those news misunderstood something. There was a GP's FEDERATION AGAINST EXACT (FAEX), not against GP.

2) A few pages later in that SMASHER magazine there was again a news about us. ALC and GP make a Copy Party in Regensburg ? Hugh ?? I didn't know it ! CMC/GP was kicked out (Armin ist arm. the Editors) so it is only an ALC-Party. (If it's ever gonna take place anyway... because CMC is an old 'Bläher')

3) Right !! This is the first true news ... the GP Party was lame! When we from GP (Aachen) and GP (Kopenhagen) arrived there down in Nürnberg, we almost died of shame ... The room was fucking small and nothing special at all at this party ! So we decided to kick out 75% of all GP members.

711 wrote a report about that party and I agree in every point, they are right !

And now listen all your suckers who said there have been only lamers at the party ... When I arrived at that party (all in all I only spend 1 hour at the party, rest of the day I was in a restaurant near the party), I went to some guys and asked them who they were. The answer was: Unitrax, EGA, Hellhouse and many more lamers!!

So, I was sure we in GP didn't give them an invitation. So I asked them : "Hey ,who the hell gave that invitation to you ?" Guess what they said ... "Shinnin 8 gave it to us ..." Aaarghh So blame S8 for those lamers at the party, not us , OK !!?

But there was something in the article of 711 I did not agree with... they said nobody had stuff (new) and so it was lame. Right But why didn't 711 any cracks , eh?

CUT IT AT THE BORDERS AND YOU CAN USE IT AS A POSTER !!

Warp System is back in GP...What ??? Ehh..Sorry..Nobody in GP knows anything about that.You know ..TWS think they are mega-cool. So, why should those gigants join our lame GP-team again (irony)

Scrap System left us ?? No,he was kicked ! Anyway,Scrap and I (TNT) are stil good friends...

Again about the 711 article...RIGHT...Ikari,Sphinx,Legend,HTL, and lot's more were expected.But let me tell you,MCG said ,Ikari and SCG were about to come.So,blame them! HTL and SPHINX had some delays to come (no car,too far away etc..).

Aaaarrghh ! Who is Frontline 1842 ?? There was an article of them in which they pretended to be another arranging group of that party.Well...again we in GP don't know anything about it. Frontline also wrote they made the first place in our demo comp. Hugh ?? We didn't make any demo competition ! (We've been too tired to arrange it.We had 3 days without no sleep !).The S8 demo was nice? Hugh...OK..and the 711 and GP demos even too,but we didn't make any demo ! Hey, Frontline ... you know what ? You are L A M E ! (Shut up and learn to speak german) !

OK,OK...This article was a bit (ahumm..) long but it had to be.! Some more chatting...

-EGA,Devil (ex Byterapers),TMB (Snoopy) and TFO (Robot and a coder) formed the group called COMTEX.

-Freddy left (or kicked out ??) GP and joined FIRE EAGLE.

-RAW (BSC+Dr.J) were kicked out because they are bad coders with biilig mouths.

-Mac Scharfi (Drax) and Darth Vader were kicked out because of recracking and coding a lot of shit.They formed the group 'HELLCATS' !

One last word...All you guys who want to be cool...Please stop giving idiotic rumours to SMASHER. I think this magazine should be a cool one without lies.

If you know something, tell it to SMASHER.But not only if you think it might could have been.Ok ? Anyway...we all should unite again.Too many wars and trouble among us.

OK,that's it... your philosophic friend TNT/GP signing off.

.S.:To avoid further rumours GP members are only Frankieghost,011,Boozer,Micro,Hires,Technic,Alf,Dr.Spike,Snacky,Hijack and TNT

URATOM was kicked out of MCG (they were too lame !)

he cops got Marc of MCG

here's a new group called TOPIC (Members are FALCON,DARRY DISASTER and SYSKILLER !!)

Now we tried to gigitize something, so we put a film into the videorecorder and stopped playing when we found a nice picture ! Afterwards we pressed return to digitize it and after for seconds we saw the result ! Great !!! Now we changed some colours and we'd fixed it to a masterpiece. When we took a videocamera and it were very good !

HOT GAME...!

OOH !

Central

COZ IT IS CHRISTMAS, COZ SO MANY PEOPLE LIKED THAT EDITION WE BRING YOU A SPECIAL PAGE OF 'GIRLS/FREAKSIDE' !!

TAKE IT EASY !!

Ok! well here we go with some funny information fo you!
 First I want to greet my special friends Deegay and Jack, Fate, Daryte in the Stadds and amige. Well, at first I would like to tell you about my adventures on the telephone-net around the whole earth. Well, the most guyz use their numbers for importing games or calling their friends. I also do, but sometimes I use them to make brilljokes. For example Mad Max and me called the American gouvernment and told them that we would been lost in the Central Park. So they gave us a number (212 228 1605). The dude there can also speak German as well as English. It was very cool to tool him and we were anything the most time. OK, as you know Mad Max and me were members of the legendary United Artists! Mad Max and me often try some cool tricks to make money. So we decided to put some of this information into the Smasher

Many people of you Know, that there are a lot of Radio-shows in Germany where you can call and leave a message for friends. There are also leads of them in the States. So we decided to call one: 419 240 1193. Don't try it with help of a card, because you need a lot of luck to be put through, so thats a waste of money. OK, it's very expensive if you will be put through, but the ammounts you will make with our trick is much higher than your phone-bill! If you are through, be fast, because you have about 2-3 minutes for your call, but than millions of people in Ohio will hear you!! It's very simple.

Just say that you are calling from europe and say them to take a pencil quick. Then give them your adress. The best way is giving a post-box number (PLK or Postfach). This has two reasons. First it's easier to give 'em a short number instead of a long adress and the second reason is that you fool the people who write you so you may have a lot of problems about doing it with your real adress. After giving them your adress, you just have to say that you want to write them back, but only if they send you 3 dollars because of the package-prices. Ur say that your mum is dead and that you hope that all these helpful americans will send sum money. Oh, that's it !

And now we will continue with sum other information. Have you ever heard of PROBYTE ? Have you ever heard of PARSEC TEN ? Well these are the names of a brand new software and their first product ! These awesome people need more people who are interested to write high quality games. If there are sum people out there they should write to this adress: P.O. Box 10489 C , 4700 Hamm !

PARSEC TEN is their first release. Perhaps you remember the preview we spread when we members of the CHAMPS, but this prev. has nothing to do with the new game. It's a shoot'em up with mega graphics, action packed levels and a fas FAME sound ! Watch out for it !

As we heard from the founders of the company the programme has made the best cracking protection ever ! And PROBYTE company said us to warn all the crackers, coz they would have all the addresses of cracking freax and if there's any one who dares to crack it they would kill him ! I also want to see if the protection is really uncrackable !!

I also talked to the programmer and made an interview. It will be published in the next issue !

Ok, that's it for this time. Next month I will you tell more tricks and news !

ZEBBELS BOARD

Hi there in the scene! Some stupid guys like Lions suppose that they are cool when they try to tell lies about a cool group. But with this they make a fool of themselves and this is another prove for their folly!

Hey Peter, your nose is wonderful, like your mother's one. What about a nose operation, i think the medical men are specialists to correct big and large noses.

But now some news of Zenobits.

We're proud to tell you that our new group is now united with NATO in Engiand. So watch out for horney releases of this mega-cop. in the future. Often we were asked how much members have the Zenobits. To satisfactory the curious guys, we'll give you a short list with their job:

- Greco: cracker and coder.
- Baal: mainswapper, introtext writer and always on phone.
- Yazz: musician and swapper.
- Hellrider: coder and swapper.
- Z.J.: musician and swapper.
- Taxman: supplier and coder.

Rape off all those shining guys, cause Reptil used our codings for his demo 'forever together'. In opposite to Brandis of S8 he add his mistake but then he denies all. And then he told that we recrack games. That's of course wrong, so check this out. Besides, I've heard that the shiners're going to stop all comp. activities. O.K. that was it, now I'n play Batman, Bye.

aaaaan. h ! I see your eyes b-come enlarged. Yep it's
 ue ! Rainbow Arts has dun it ! ... Wot ???
 pard- on the 9th of december. It starts at 20 o'clock
 d w only 4 people who work at Rainbow Arts. I get
 ere with a friend of mine, Adam/F.A.M.E.. As we arrived
 ere were only a few guys which we know: Manfred Trenz,
 e programmer of Katakis (read the Interview, too !), Chris
 lsbeck/Heinrich Lenhardt and Boris Schneider from
 overplay". They said sum shitty things about ASM (only
 children, no niveau, etc ...) and told us that they'll
 rk from the 1.1.1989 for Rainbow Arts. We talked a bit,
 e a bit and drunk much beer, 'coz it was so awful here !
 ter Markus/Radwar has spread his party invitations we
 nt together with him, Chris and Manfred in the room
 ere Chris fixes his famous sounds. It looks like a small
 udio with synthesizer, mix-machine, power-tower, video,
 iga, two C64 and sum Porno magazines. He shew us his
 west sounds and I must say : they are superb. Markus
 ew us sum new proggy's ,too, some were good, sum
 en Santa Claus came and shook hands with us (then it
 s time to leave very quickly Uahaah !)
 a result I must say: Good party with good organisation
 om Rainbow Arts.
